

## WASTEWATER COMPANY ATTAINS FLEXIBLE, SAFE TRANSPORTATION WITH BULK EXPRESS INTERMODAL

A Wisconsin manufacturer tasked an environmental engineering company with disposing of its wastewater. The company reached out to Schneider for help efficiently transporting the wastewater to treatment facilities in Texas and Oregon.

## THE SITUATION

Production of the wastewater is unpredictable, varying between seven and 14 loads weekly

Treatment facilities were on inefficient — and costly — over-the-road routes

Company was under pressure from its manufacturer client to ensure a smooth process

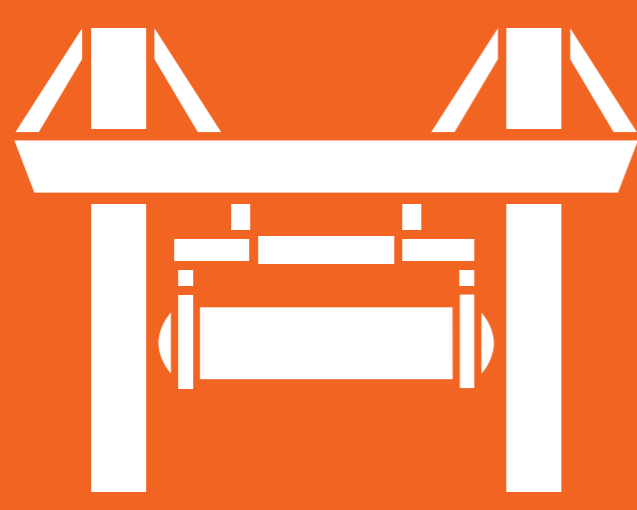

## THE SCHNEIDER SOLUTION

Since wastewater shipments were not time sensitive, an intermodal solution was possible

Because Schneider has a large supply of containers, it could drop them off at the manufacturing site to be filled as needed

Schneider transported full containers to Chicago, where they moved to rail to reach their final destinations

## THE RESULTS

**SCHNEIDER PROVIDED  
FLEXIBILITY WITH  
NO PROJECT DELAYS**

**GOING INTERMODAL PROVED  
COST-EFFECTIVE  
AND ENVIRONMENTALLY FRIENDLY**

**SHIPMENT TRACKING AND  
FREQUENT COMMUNICATION  
— DELIVERED AN EXCEPTIONAL —  
CUSTOMER SERVICE EXPERIENCE**

With a bulk express intermodal solution from Schneider, the company was able to deliver a safe, flexible and cost-effective wastewater transportation service for its customer.
