

SCHNEIDER PORT LOGISTICS: BRINGING ORDER TO INVENTORY OVERLOAD

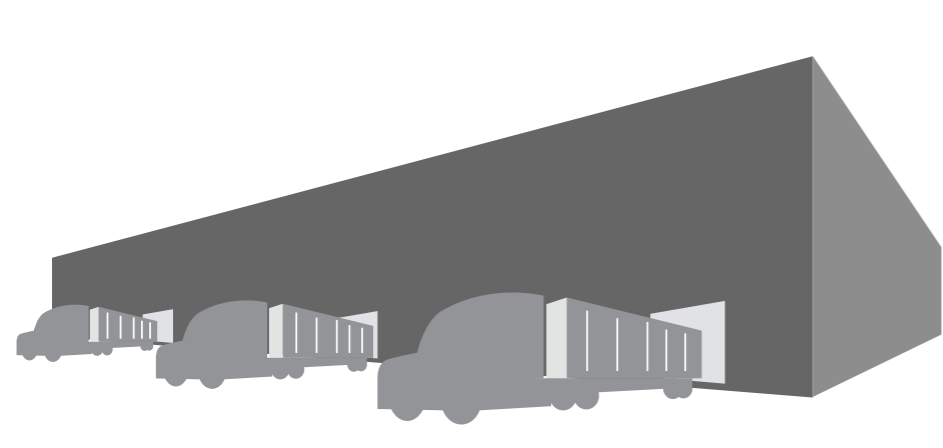

Here's how we helped a fast-growing pharmaceutical retailer free up space in its congested distribution centers and keep store shelves stocked with the right products.

THE SITUATION

With seasonal inventory on the rise, overcapacity at this retailer's distribution centers (DCs) created problems across its entire supply chain:

Per diem and demurrage charges at the port swelled

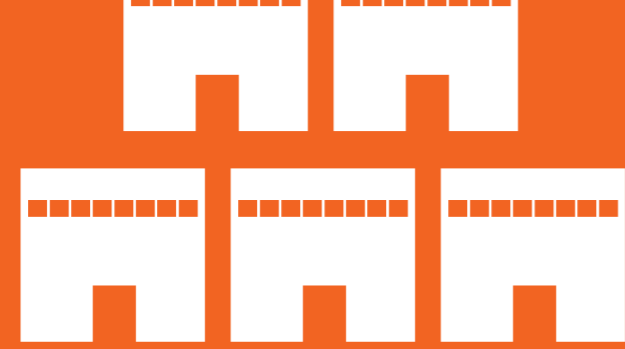

Congested DCs led to challenging and unsafe working conditions

Delayed shipments kept core products off the shelves

THE SCHNEIDER SOLUTION

We put our Port Logistics expertise to work, creating a DC bypass solution for safer, smoother delivery. Here's how we did it:

Utilized five Schneider warehouses in place of DCs

Ended seasonal inventory shipments to and from DCs

Shifted DC focus back to retailer's core products

Ensured on-time port pickup of all incoming shipments

THE RESULTS

**IMPROVED DC
SAFETY AND
PRODUCTIVITY**

**ELIMINATED PER DIEM
AND DEMURRAGE COSTS**

100%  **N-TIME
DELIVERY
OF SEASONAL PRODUCTS**

For three years running, our streamlined approach has brought order and efficiency to a once chaotic supply chain. With the supply chain running smoothly, all products are hitting the shelves on time.
